

ADVENTURES IN LEARNING COURSE OFFERINGS - SUMMER 2016

GRADES 1-2

THE RAD RAINFOREST-Kim Alderman

Step into the tropical rainforest as we explore and study the climate, soil, and plants and animals that call it their home. We'll read books, see videos, and create a mini-rainforest in a bottle.

PATRIOTIC CRAFT PROJECT-Lisa Basso

Proud to be an American! Join this one-week class to learn some patriotic facts about America and Illinois. You will leave the week with a take-home project to hang proudly in your home!

KIDS IN THE KITCHEN-Katie Jerome/Beka Horcharik

Welcome to the kitchen! In this session, students will learn the basic skills needed to create delicious, appetizing meals from start to finish. We will also discuss and employ safe kitchen skills and practices while enjoying our home-cooked food each day! **Please indicate any food allergies on the registration form. There is an additional \$10 fee for this class to cover the various ingredients used in the recipes.*

CHEER & DANCE FOR THE WARRIORS!-Nicole Armitage

This is a perfect class to take if you want to be a future Warrior Cheerleader! This is a great class to learn motions, voice, synchronization, and memorization! You will learn jumps, sideline cheers, floor cheers, and even a dance! We will have a BLAST learning some fun cheer games too! We will even have an opportunity to perform! Just bring your enthusiasm and smile!

AGRICULTURE IN THE CLASSROOM-Nicole Armitage

We will learn about a variety of topics! We will be learning about Pumpkins, Cranberries, Dairy, and more! This class will include art projects and EVEN making food! Who wants to make homemade ice-cream? Don't forget the BEST part...taste testing all the food!

GRADES 3-7

STEM Science Fun!-Katie Whitehurst

Join Mrs. Whitehurst for fun hands on activities that will challenge you! Activities include building the tallest tower you can out of balloons, designing a boat made with straws and paper that will float holding the most weight, making a device that will protect an egg from being dropped off the CIS balcony, and much much more! During this week we will work with ordinary household items to integrate science, technology math, and engineering in fun ways.

ORIGAMI GEOMETRY – Ashley Rowe

Explore the ancient art of origami in this one week class. You will learn about origami history and the geometric concepts that go into the art. We will study examples to create many of our own masterpieces. From animals to sports - who knows what you will create?!

ART FROM AROUND THE WORLD- Katie Whitehurst

Join Mrs. Whitehurst for a trip around the world using art! Throughout the week we will learn about how art has been created in different countries throughout history. We will create Mayan string art, Australian Aboriginal dot paintings, Japanese origami, South American Mirrors, and so much more!

PATRIOTIC CRAFT PROJECT-Lisa Basso

Proud to be an American! Join this one-week class to learn some patriotic facts about America and Illinois. You will leave the week with a take-home project to hang proudly in your home!

VIDEO EDITING-Justin Tarrillion

Calling all audio-visual technicians! Join us this week for a crash course in making your own music videos. You'll first take a video to upload into iMovie maker and then learn how to add sound to make an original music video. If you love browsing YouTube, you'll love creating your own stuff!

iPAD ADVENTURES-Michele Lowry

Move over laptop! The iPad is the new thing for our generation. In this class, students will have a unique opportunity to explore the iPad and several different kid-friendly apps it features. You'll be blown away at all the neat stuff out there just waiting to be downloaded!

BIG KIDS IN THE KITCHEN-Katie Jerome/Beka Horcharik

Welcome to the kitchen! In this session, students will learn the basic skills needed to create delicious, appetizing meals from start to finish. We will also discuss and employ safe kitchen skills and practices while enjoying our home-cooked food each day! **Please indicate any food allergies on the registration form. There is an additional \$10 fee for this class to cover the various ingredients used in the recipes*

DODGEBALL MANIA!-Sean Knox

What is everyone's favorite thing to do in PE? DODGEBALL! Meet us in the gym for some non-stop competition and fun led by the super-cool dodgeball guru—Mr. Knox! ☺

AGRICULTURE IN THE CLASSROOM-Nicole Armitage

We will learn about a variety of topics! We will be learning about Pumpkins, Cranberries, Dairy, and more! This class will include art projects and EVEN making food! Who wants to make homemade ice-cream? Don't forget the BEST part...taste testing all the food!

CHEER & DANCE FOR THE WARRIORS!-Nicole Armitage

This is a perfect class to take if you want to be a future Warrior Cheerleader! This is a great class to learn motions, voice, synchronization, and memorization! You will learn jumps, sideline cheers, floor cheers, and even a dance! We will have a BLAST learning some fun cheer games too! We will even have an opportunity to perform! Just bring your enthusiasm and smile!

JEWELRY MAKING- Michele Lowry

Necklaces, bracelets, and any kind of bling you can imagine! We'll use yarn, beads, and all kinds of materials to make some really cool jewelry throughout the week. Just bring your creativity! **There is an additional \$10 fee for this class to cover specialized supplies needed.*
